## Contents

<b>Pre-Contact Pottery and the Woodland Occupations of Vermont and the Northeast: a Closer Look at the Significance of the McNeil Site (VT-CH-93)</b> by Laurence M. Wolf	1
<b>Looking Back at Archaeology and Cultural Resources Management in the United States and Vermont Through a Forty-Year Mirror</b> by Giovanna M. Peebles	23

### Front Cover Photo:

The Chittenden County crew spent several weeks surveying lands around East Creek in Orwell. The purpose of the survey was to document as many archaeological sites as possible in case the notion of siting a nuclear power plant on East Creek moved to the next step. DHP employee Davis Koier, (State Archaeologist Giovanna Peebles' first assistant) and University of Vermont Senior in the Department of Anthropology, Jean Dedham (then Sbardellati), measure a test unit next to the East Creek wetlands.
